

*Currently available through in **eta** in Dubai only*

One-on-one training

This module in one-on-one training teaches you to incorporate your knowledge and skills of exercise and nutrition and apply the scientific principles of exercise programming when instructing participants. Qualifying students are able to plan, instruct and evaluate safe and effective exercise sessions.

Subjects include

1. Designing and planning safe and effective exercise routines
2. Instructing exercise using appropriate teaching methods and leadership skills

Credits and duration of the course

The credit value of this course is 15 credits (150 notional learning hours). If you allow approximately 10-hours a week for studies (including tasks for assessment and experiential learning) you will take 15 weeks to complete the module.

Programmes are learner-paced. Students learn at different rates and some become competent and confident sooner than others. Our experience informs us that students who follow the learning process usually master the learning in the expected time frame.

Admission Criteria and certification requirements

1. **Qualified applicants:** If you hold an NQF level 5 qualification which includes exercise science and nutrition, you need to provide proof of your certification when you register.
2. **Unqualified applicants:** You need to complete the learning and assessment criteria of the prerequisite/s and the specialisation.
3. **Self improvement:** It is possible to attend the specialisation but not take assessment.
4. **Certificates:** Certificates are only provided once fees are paid in full and on successful completion of all assessment criteria. Certificates of attendance are **not** provided. Students receive a letter of registration and confirmation once they register.

Students receive the following: eta File with study guide and evidence portfolio.

Studying through an eta campus

This module may be run as part of an existing eta programme or it may be run separately. If run separately, the following procedure will be followed. Please check with the eta to clarify timetables.

1. Induction session and introduction to the learning system

You will attend an induction session given by an eta facilitator. The aim of the session is to prepare you for the learning and assessment process. In addition, it is an opportunity for you to clarify your expectations and for eta to ensure that you understand their expectations.

2. Attend a practical workshop at your campus

Once you have familiarised yourself with the material and the specialisation's practices, you attend a practical skills workshop with a qualified practitioner who is experienced in this specialisation. The workshop focuses on practical application to help you acquire a deeper understanding of the skills required for your specialisation.

3. Arrange a practical session at your campus through your facilitator

You will give a demonstration at your campus where someone from faculty will attend to determine if you are ready for assessment. If the faculty member is satisfied you can prepare for your summative assessment. If you are not ready for assessment, feedback will be provided on areas that need more work and on what to practise.

4. Learn and practice what you have learnt

As a self-reliant student, you study your manual, follow the study guide, gather evidence for your portfolio and immerse yourself as a participant in your specialisation's practices.

5. Practice your skills

Once you have familiarised yourself with the necessary knowledge and skills you need to practice your newly learned skills on your own, in local facilities, in front of a mirror or with willing participants. You learn by practicing and at times through trial and error. If you need more guidance from a subject expert you can arrange this privately and you are liable for extra fee that they charge.

6. Submit your portfolio of evidence and arrange a practical demonstration

Submit your completed tasks and complete a practical demonstration for summative assessment. You are required to make a DVD of your demonstration and then submit the DVD for assessment. You will receive written assessment feedback and results.

To register

Complete the **eta** registration form for specialisations. You can also go to the website www.exerciseacademy.com and click on the **short course** button on the home page.

Accreditation

For details of **eta** accreditation check on the **eta** website: www.exerciseacademy.com

Continued Professional Development Credits

All **eta** fitness modules and specialisations will be registered with REPS SA for Continuing Professional Development credits.
